

## BEFORE YOU SHOP – VANITIES

### WELCOME TO SOUTHERN LUMBER'S VANITY SALES DEPARTMENT

Here are a few questions to consider, that will hopefully help make your vanity buying experience easier and more enjoyable. Please read through these questions and where possible try to answer to the best of your ability. This questioner and information guide is intended to help you consider and gather as much pertinent information as possible prior to making your purchase. By doing so it will help to make your ordering process quick and easy!

**One of the most important things to consider, is the width and depth of the space available.**

1. What size of Vanity do you need?
  - a. Standard widths are: 24, 30, 36, 42, 48, 60, 72.
2. What is the Depth needed (front to back)?
  - a. Vanities come in standard depths of: 18 or 21
3. What height best fits you?
  - a. Manufacturer's Standard Height: 31
  - b. Taller heights are available from our displayed manufacture's: R.A. Jenson 33, Woodpro and Bertch 33-1/2
4. Is your Vanity a non-standard size?
  - a. Possibly located between two walls?, or custom built by home builder?
  - b. Custom sizes are available from some manufactures, or Modular vanities can be connected together to form one non-standard size unit. Typical sizes of modular cabinets: Two door cabinet sizes: 24, 27, 30 & 36 and Drawer Base sizes: 12, 15, & 18
5. What Wood Specie and Finish do you like?
  - a. Common Wood species: Oak, Maple, Birch, Hickory, Cherry, Alder & MDF
  - b. Finishes are available in many stains and paint colors.
6. How far is your toilet from the vanity?
  - a. Building Code requires a Minimum 15 inches from center of toilet to edge of vanity.
7. Will plumbing clear drawers or pose any problem?
  - a. Look inside existing vanity cabinet and Sketch a diagram of where your drain and water supply lines come from.
  - b. Now measure from the floor up to the top of water supply valves.
  - c. Next measure distance between water supply valves.
  - d. Determine where your P-trap (waste water pipe) is located, how high off of the floor?
  - e. If cabinet is located between 2 walls measure distance from either wall to center of P-trap drain.
8. What kind of top do you want?
  - a. One piece tops are manufactured of Cultured Marble, Oynx, and Granite.
  - b. Natural Stone Tops are also available.
9. What size Top do you want?
  - a. Standard Tops are manufactured 1 bigger than vanities in both width and length.
  - b. Custom size tops are also available from some manufactures.
